Please Note: If a pole installation is in an area where an Electric Utility Line Truck and Pole Trailer cannot access the area the pole needs to be installed at the following applies…

Hand Set Pole Charge	***(One time charge, each pole)***	**$500.00**	N/A

Please Note: If a Yard Light installation is in an area where an additional pole-to-pole span of wire needs to be run overhead to get power to the new light the following applies…

Extra Span of Secondary Wire	***(One time charge, each span)***	**$90.00 (Per Span)**	N/A

An Inaccessible Pole is a pole that is located in, or will be newly installed in, a place that a City of Ocala Electric Utility T & D employee cannot get a line truck to for the normal routine maintenance associated with having a light installed on that pole. There are no gates and no fences to try to get through to get to the light. The light and pole are out in the open and are easy to get to. No pole climbing will be necessary to service the light.

The Behind the Meter charge is only applicable to those customers whose electric power is metered on the PRIMARY side of our electric utility facilities (Large Power Customers).
