

FACT SHEET

Interconnection and Net Metering Of Customer-Owned Renewable Generation

WHAT	<p>Florida Municipal Power Agency (FMPA) and its All-Requirements Project members promote the development of customer-owned renewable generation by:</p> <ul style="list-style-type: none">• Expediting the interconnection of qualified, customer-owned renewable generation with the local utility's distribution system, and• Enabling qualified, customer-owned renewable generation to offset the customer's electricity consumption from the local electric utility, this is known as net metering.
WHO	<p>The net metering program is a joint effort among 15 municipal electric utilities that obtain all their wholesale electricity from the FMPA.</p> <p>The 15 cities include Bushnell, Clewiston, Fort Meade, Fort Pierce, Green Cove Springs, Havana, Jacksonville Beach, Key West, Kissimmee, Lake Worth, Leesburg, Newberry, Ocala, Starke and Vero Beach. These utilities have policies for the interconnection and net metering of customer-owned renewable generation.</p> <p>FMPA is an Orlando-based wholesale power agency owned by the municipal electric utilities it serves. FMPA is the cities' exclusive wholesale electricity supplier, so FMPA's program are coordinated with the cities' to enable net metering from the retail customer to their local municipal electric utility.</p>
WHAT IT MEANS	<p>The program provides several benefits for customers:</p> <ol style="list-style-type: none">1. Promotes the development of customer-owned renewable energy2. Enables customers to offset purchases from their electric utility3. Enables customers to sell excess generation to their electric utility
WHAT QUALIFIES	<ul style="list-style-type: none">• An electric generating system located on a customer's premises that is primarily intended to offset part or all of the customer's electricity requirements with renewable energy that is generated using one or more of the following fuels or energy sources: solar energy, wind energy, biomass, waste heat, hydrogen, geothermal energy, ocean energy or hydroelectric power.• The generating system must also be less than two megawatts in generating capacity. (One megawatt serves on average 200 homes for the 15 municipal electric utilities.)
HOW TO APPLY	<p>Apply at the Customer Service Center located at 201 SE 3rd Street, or contact us by calling 352-629-CITY.</p>
