IV. CAPITAL IMPROVEMENTS: FINANCING THE PLAN

Through public meetings, the governing body of the North Magnolia Redevelopment Area has identified and developed Priorities and Strategies (outlined in N. above, page 11). The City of

Ocala has also identified infrastructure priorities; these projects and costs are outlined in A. below.

A. PROJECTS AND COSTS

There are five segments that are part of the Community Redevelopment Plan which impact public expenditures: road improvements, traffic improvements, water, sewer, and storm water.

1. Road Improvements

The major component of the traffic circulation system is the roadway network itself. The North Magnolia Community Redevelopment Area has approximately 7.82 miles of roadway not including North Magnolia Avenue. In February 1999, the City Engineering Department performed an evaluation of the condition of the streets in the North Magnolia Community Redevelopment Area. It was determined that slightly over one-half of the roadway (4.6 ± miles) system was in satisfactory condition. The balance of the roadway system (3.2 ± miles) requires corrective measures including recycling, leveling and resurfacing in order to improve the roadway conditions. The roadways are not shown individually on the plans.

PROJECTS AND COSTS - ROADS				
Description	Unit	Size	Unit Cost	Total Cost
Resurface	Miles	1.82	95,000.00	172,900.00
Level & Resurface	Miles	1.24	125,000.00	155,000.00
Recycle	Miles	0.16	150,000.00	24,000.00
